

# LENOIR-RHYNE UNIVERSITY

## Policy and Procedure

communication back to a device on the private network other than the computer using the original connection.

- All computers, including laptops, connected to Lenoir-Rhyne University networks via VPN or any other technology must use the most up-to-date anti-virus software approved by the University.
- VPN users will automatically disconnect from Lenoir-Rhyne University's network and any attributes of that network if the user must disconnect from the network. Pins or other devices will not be used to maintain a connection to the network.
- Only one active VPN connection is allowed per user and the VPN concentrator is limited to one connection per user in one session.
- Enforcement of this policy is the responsibility of the Information Technology services.
